Thread: [Malwarebytes Lifetime Premium Keys - \\$4 each - Bulk Orders - Crypto](#)

**Jason** - March 23, 2021, 9:16 am

Alright, so I decided to make a new thread for multiple reasons.

1. I have more stock now..
2. I'm accepting more cryptos.
3. I can't edit my old thread and update for changes.

My first thread: <https://hackforums.net/showthread.php?tid=6143245>

It's already vouched by mfw, so don't ask me for future vouches. You can also see customers' vouches in it.

Selling MalwareBytes Lifetime Premium Keys for \$4 each. Terms:

1. 1 key for 1 device.
2. Windows OS only.
3. Use the malwarebytes personal version, not the work/business one to activate the keys.
4. Payment methods: BTC, LTC, and ETH.

Bulk Orders/Resellers:

Keys are available for \$2 each and same payment methods.

Contact: PM me or add me on discord which is also in the first thread. Vouches are already in the first thread as I mentioned above.

It doesn't work that way. Keys are just uncappable of being activated on this OS.

**ZFScrypt** - April 5, 2021, 5:25 am

Bought a key, working so far! Seller responded quickly :)

**Host** - April 5, 2021, 11:54 am

**Cyber Rick** - April 5, 2021, 1:32 pm

Started a contract. Hopefully the key lasts lifetime.

Vouch, bought a key and it worked as stated in the thread. Malwarebytes also shows the key "Never Expires" so let's hope it stays that way.

**OMARATION** - April 6, 2021, 1:42 pm

The key is redeemable on their site or just via the MB client?

Just via the MB client.

Bruh these cracked codes can get revoked. Stop stealing keys that belong to people. You load up openbullet, load up mbam's config, add your proxies, run the generator and run em all through til you get hits. The reason you can't run it on the site is because it already belongs to an account meaning someone paid for it. It's the same as buying a cracked netflix account.

These keys are not sold to someone else. Lifetime keys can't be sold to someone else. You have to understand that. Plus, Malwarebytes stopped supporting them after malwarebytes version 3 and call them pirated. But in fact, they are OEM licenses that will not work on the website simply because malwarebytes will automatically notice and revoke it.

no chief, the reason they don't work on the website is because they are already tied to an account. They aren't supposed to be sold to others (against their ToS). When you "generate" a key via client, click on account management where it opens up a link and try putting in your own email :)

Lifetime keys are not sold. How can't you understand that? Keys with EXPIRATION DATE are the only ones sold to customers. I'm basically telling you how a company make profit lol. Also, please, I don't want this thread to be filled with our conversation. If you are worried, ask anyone who bought it. Otherwise, there's a private chat that you can complain on with me.

your blackhat selling is not allowed here. You want to tell me how their company makes profit but you're slithering your way into selling pirated keys. when MBAM was a small company they sold lifetime keys and once they started to grow, back in 2014 they switched to a subscription model to keep the money rolling in after v2 (

<https://blog.malwarebytes.com/malwarebytes-news/2014/03/malwarebytes-anti-malware-2-0/>).

Anyone who had a lifetime key before march 2014 was grandfathered in and kept their lifetime key. The keys you are selling are not guaranteed to work in the future and are stolen so buyers beware.

<https://forums.malwarebytes.com/topic/203346-does-malware-bytes-sell-lifetime-keys/> should clear it up for you.

I want one now and in the near future, I'm going to reinstall Windows 10. So do I need to deactivate Malwarebytes first?

Once you have the key, you could do whatever. If you want to use it on another pc or after reinstallation, deactivate the key, and re-activate on the new system/pc. Just make the sure the time difference doesn't exceed 30 minutes. Otherwise, hand it to me again and I'll store it for you until you reinstall the windows in the future.

Contract initiated.

Where did you acquire these keys? Might be interested in buying some for convenience, but would like to know where these keys came from.

These keys were purchased back when malwarebytes were supporting lifetime keys. They don't now, but they couldn't undo the purchases so they removed that facility on their website, but they still allow it on the application only.
