Thread: [I will signup under your CPABUILD Referral Link](#)

Heisenberg - March 23, 2021, 10:02 am

Hey everyone! So I'm having trouble getting accepted to CPABUILD and was wondering if you could help me!

I will sign up under your ref. link, (assuming you make money with them) in order to get approved... That is my theory lol

If you have any other suggestions on getting approved, please share! Thanks a lot!

Alright. I'm around CPAElites a lot and from lurking in that forum I found out CPABuild does reject people from certain countries due to "fraud" measures. This was surprisingly "confirmed" by Jay, the affiliate manager.

Here is his full quote:

"CPABuild does accept users from Africa, Saudi Arabia, India, Pakistan, Eastern Europe and most parts of Asia. The only country that you listed which we don't accept users from, is Bangladesh. Most networks block countries that they deem to be problematic and we are no different. It's nothing to do with racism, but about protecting our business from people that repeatedly choose not to follow our rules. As a business, we have a right to choose who we will and won't work with. Also, as a US company, there quite a few countries that we cannot legally make payments to, so some countries are blocked for that reason. Please educate yourself before making such ridiculous claims.."

Here is that thread, It's a very recent one from January 2021 -
<https://www.cpaelites.com/forum/threads/cpabuild-profiling.68172/>

I'm not sure what your home country is but I recommend masking your real location with a VPN. Maybe [ProtonVPN](#).

It's the best free VPN that I personally use. Servers are always up. Set your country to America before visiting my link.

Here is my referral link you can use. - <https://cpabuild.com/register/r/167744>

Upon signup fill in the normal details but under websites, use someone else's website. They don't verify or care. Ideally the person's website you use should be one with a lot of files that can people can download. This is so under the promotion options, you can tell them you plan on monetizing your file downloading site with their content locking scripts. Write 2-4 sentences of what I just said under their promotions and make it detailed.

And to be on the safe side, always switch on your VPN to USA before accessing the site.

Thank you! Will signup up under your ref link!!
