Thread: [Private Mass Spreading Method | Targeting | Only 2 Copies | Load Thousands of Bots](#)

Teleforce - March 23, 2021, 12:11 pm

hello,

I'm selling my private technique & method for mass spreading your malwares such as RAT or Botnet. I have been doing malware spreading since long time and I had become an Expert in this field. With my method you do not need to buy exploit kits nor traffics nor expensive malwares any more, with a normal rat or botnet you can start your spreading and infect thousands of computers and mobile phones(Android). All you need is a stable rat or w0rm with a good crypting which bypass pro actives.

Selling only two copies , each copy is 700\$ only. My method do not requires advanced spreader/hacker or big knowledge in this field even a beginner can start with it , your malware will get into a large number of computers / mobile devices in less than a week.

F&Q:

What will I need for this method ?

The answer is very simple, just a FUD rat or a botnet file which will be binded with a software.

How Can I start ?

After purchase, in the first day I teach you the method completely, second day through Remote I show you how to spread your first infected software/program/game.

Tips and tricks available?

Yes, i will teach you some of the tips and tricks which makes your malware spread more and attract more users on the internet from the place were they see your content.

How are the targets?

You can target different types of user in which they are interested for downloading such as softwares/programs/games/office products...etc or mix users.

Will you provide help for the malware setup and crypt?

Depends on your knowledge I will help you and put you on the right road to start your game!

What about support?

In 3 days you will learn all the required tasks , I will provide you support for 1 week, even in 4 days you will not need me any more and daily you spread your infected softwares without detection! but I still provide help when needed.

What about infecting the software?

I will teach you this also, how to bind your malware with any program without size limitation , e.g. bind your malware with a program which have large size like 500Mb , 800Mb, even 5Gb with %98 undetection ratio. This will make harder to detect your software or analyze it or upload it for scanning even harder too feel it by the users!

Some screenshots of my old spreading, using normal rats and worms

Payment bitcoin , price 700\$ per copy. Only serious buyer PM me.

I have private method to..but only for eu targets but i neverrr make public haha

We can maybe work something out?

Sorry, Vouch not available as the method is private and not public like other methods that is why I sell 2 copies only.

Still for sale, get your copy at 700\$ and Load Thousands of Bots to your botnet !

Furiosa - March 30, 2021, 5:12 am

interesting thread, if you changed your mind about a vouch copy, i'm ready to grab one and to make a review. 700\$ it's a high price for spreading method, people should know if worth it.

ps: i don't rat or botnet, but seams interesting for me the exploiting ways of humans.

zharmany111 - April 19, 2022, 3:13 am

Hello boss, please i need you to load victims on my rat...USA victims only, please how much would that cost me?

LeadPal - April 19, 2022, 7:57 am

Can you tell me more over PM please
