Thread: [Bitcoin/XMR Wallet with Cheap Fees](#)

PingByte1337 - March 26, 2021, 6:13 am

Hey Guys,

im looking for a new wallet (i was bitpanda)

- cheap fees
- accept bank from germany
- support xmr and bitcoin
- with low minimum turnover

thanks in advance

Ok, so you're confusing wallets with exchanges.

If you're looking for a wallet, I'd recommend.

For Bitcoin:

Hardware: Coldcard, Trezor

Desktop: Electrum

Phone: BlueWallet

For Monero:

Hardware: Trezor

Software: Monero GUI or MyMonero

As for exchanges, there are plenty of good ones. These are a few I use or have used:

Coinbase, Gemini, Kraken, Binance

What I'd recommend is buying BTC/XMR from an exchange and transferring to a wallet you control.

Don't rely on Wallet/Exchange hybrids for storing any large sums.

If i were you, I'd use a trezor wallet or maybe the Authereum desktop wallet. For exchanges, you might wanna look for decentralized exchanges like bisq or curve.fi. I don't like using coinbase or binance because i'd be giving my information away (and it defeats the purpose of cryptocurrency), but it's up to you.
