Thread: [Expressvpn is the best VPN on the market](#)

Cumcast - March 26, 2021, 10:57 am

i recommend you to try it

they have added a now protocol (fucking fast)

expressvpn.com/blog/lightway-protocol-beta/

i've tested protonvpn, surfshark, windscribe and they fucking sucks

expressvpn > all ?

Herbert - March 26, 2021, 11:08 am

But does it have military-grade encryption?

Cumcast - March 26, 2021, 11:14 am

(Mar 26, 2021 11:08 AM)Herbert Wrote: [\[CITE\]](#) But does it have military-grade encryption?
yes they have

imgur.com/a/twhmTCc

DocShifty US Army Retired - March 26, 2021, 11:21 am

Cyber ghost is pretty solid to be honest.

Juoku - March 26, 2021, 11:30 am

Express is nice and all but I do agree that [censored] is awesome as well, my choice is Azire, that's the one I use :)

Easy, nice, cheap, no logs but to each it's own I guess ;)

jecoylecroy - March 26, 2021, 10:00 pm

I want to try it. How much is the monthly subscription.

SIM-4967151 - March 26, 2021, 10:07 pm

i use [censored] atm lol but i guess I'll give it a shot or at least a look, thanks.

Roberto Scorpius Malfoy - March 26, 2021, 10:31 pm

(Mar 26, 2021 10:07 PM)Kiba Wrote: [\[CITE\]](#) i use [censored] atm lol but i guess I'll give it a shot or at least a look, thanks.

That shit sucks man, doesnt even work to connect to it sometimes.

I have been using ExpressVPN lately but a lot of websites recognize ExpressVPN IP addresses as a VPN and they block it which sucks.

sweatpants - March 26, 2021, 10:34 pm

I'll have to give this a look. :) Ive been loyal to N-o-r-d for the last 2-3 years so we'll see how this goes

Cumcast - March 27, 2021, 12:18 pm

<https://proprivacy.com/vpn/comparison/best-no-logs-vpns>

1. expressvpn

he best no-logs VPN. This top-tier provider takes security seriously, combining zero-logs, strong encryption, & privacy features.

(Mar 26, 2021 10:31 PM)Roberto Scorpius Malfoy Wrote: [\[CITE\]](#) That shit sucks man, doesnt even work to connect to it sometimes.

you should try different IP address in the vpn list

finding one which is not banned

A Nobody - March 27, 2021, 2:33 pm

Not my favorite but it works for most of what you need it to.

Forensic - March 27, 2021, 3:41 pm

Really? I am sure there must be better than express. Does anyone have better?

Cumcast - March 27, 2021, 3:45 pm

(Mar 27, 2021 03:41 PM)NoAgency Wrote: [\[CITE\]](#) Really? I am sure there must be better than express. Does anyone have better?

[censored] or expressvpn

Marxist - March 27, 2021, 5:08 pm

I own my own VPN, don't need a third party involved.

Cumcast - March 27, 2021, 6:21 pm

(Mar 27, 2021 05:08 PM)Marxist Wrote: [\[CITE\]](#) I own my own VPN, don't need a third party involved. how many ips you have?

Tyr - March 27, 2021, 7:20 pm

(Mar 26, 2021 11:21 AM)DocShifty US Army Retired Wrote: [\[CITE\]](#) Cyber ghost is pretty solid to be honest.

One thing I do like about CG is the theme but for the features it's a little pricey. Unless this has changed in the last couple of years.

Am I the only one here who likes ProtonVPN?

Billy Bob - March 27, 2021, 8:01 pm

I used ExpressVPN's 7 day free trial and it was a solid vpn.

(Mar 27, 2021 07:20 PM)Fad3d Wrote: [\[CITE\]](#) One thing I do like about CG is the theme but for the features it's a little pricey. Unless this has changed in the last couple of years.

Most unstable VPN ever. Atleast in my personal experience.

Ellis Ben - March 27, 2021, 8:29 pm

Will I be able to access HF on this VPN?

Marxist - March 27, 2021, 9:23 pm

(Mar 27, 2021 06:21 PM)Cumcast Wrote: [\[CITE\]](#) how many ips you have?
4, but that's only for redundancy. I'm only worried about local traffic. I don't need multiple IPs, I run the VPN to protect local traffic and reverse proxy to servers.

Also military encryption makes me lol. It must be some weak encryption if it is.

Cumcast - March 28, 2021, 1:23 pm

(Mar 27, 2021 09:23 PM)Marxist Wrote: [\[CITE\]](#) 4, but that's only for redundancy. I'm only worried about local traffic. I don't need multiple IPs, I run the VPN to protect local traffic and reverse proxy to servers.

this is the problem with vps, they have only 1 ip address

Marxist - March 28, 2021, 1:31 pm

(Mar 28, 2021 01:23 PM)Cumcast Wrote: [\[CITE\]](#) this is the problem with vps, they have only 1 ip address
You can literally buy a second IP for \$1 and assign it to a sub interface. Or get multiple servers for like 3 dollars. lol

Cumcast - March 28, 2021, 1:36 pm

(Mar 28, 2021 01:31 PM)Marxist Wrote: [\[CITE\]](#) You can literally buy a second IP for \$1 and assign it to a sub interface. Or get multiple servers for like 3 dollars. lol
which vps provider with 1\$?

Proxies.tv - March 28, 2021, 2:36 pm

(Mar 26, 2021 11:14 AM)Cumcast Wrote: [\[CITE\]](#) yes they have

imgur.com/a/twhmTCC

Obviously you don't know what military encryption is. And I guarantee you, no public vpn provider has military grade encryption. The highest vpn protocols can support is 256-bit. Military grade encryption is about 50 times higher than that.

Cumcast - March 28, 2021, 2:40 pm

(Mar 28, 2021 02:36 PM)Proxies.tv Wrote: [\[CITE\]](#) Obviously you don't know what military encryption is. And I guarantee you, no public vpn provider has military grade encryption. The highest vpn protocols can support is 256-bit. Military grade encryption is about 50 times higher than that.
no need that

Proxies.tv - March 28, 2021, 2:42 pm

(Mar 28, 2021 02:40 PM)Cumcast Wrote: [\[CITE\]](#) no need, it's enough to be anonymous ?
Encryption has absolutely nothing to do with being anonymous. Where did you go to school? Or did you?

Cumcast - March 28, 2021, 2:44 pm

(Mar 28, 2021 02:42 PM)Proxies.tv Wrote: [\[CITE\]](#) Encryption has absolutely nothing to do with being anonymous. Where did you go to school? Or did you?
are you haughty?

?

find my real ip if you are so good

Proxies.tv - March 28, 2021, 2:48 pm

(Mar 28, 2021 02:44 PM)Cumcast Wrote: [\[CITE\]](#) are you haughty?

The military and other government organizations use standardized protocols for encryption, the same ones your VPNs use. lol

"Military grade" is a marketing ploy for people who don't know anything.

Proxies.tv - March 28, 2021, 2:54 pm

(Mar 28, 2021 02:52 PM)Marxist Wrote: [\[CITE\]](#) The military and other government organizations use standardized protocols for encryption, the same ones your VPNs use. lol

No, they don't. Governments do not use public encryption systems. They use algorithms developed by the military and national intelligence agencies. They do not use the same encryption algorithms as used in public vpn services.

198riseup - March 28, 2021, 3:01 pm

I assume you have the qualifications and you work in that sector to prove me wrong then?

You can literally google the NSA's guidance on transport of Top Secret data, which states AES-256 with a minimum of a 3072-bit RSA Key. Which you can do yourself. AES has been chosen as the as the defacto standard for government use since 2001.

Do you really think the NSA is going to use public algorithms and not develop their own? Why do you think the world's top encryption specialists work for them? And do you think the U.S. military is using standard AES encryption? I don't think so.

Marxist - March 28, 2021, 5:13 pm

I refer to my first sentence. I know otherwise. ? Do you really think the government won't contract that out? Oh wait. There's an entire program for commercial solutions by the NSA.

You sure do hold a lot of faith in a military. It's apparent you have no clue how the government operates.

Tin foil hats can be made at home! I recommend looking up a tutorial on YouTube to best suite your needs.

Spoiler ([Click to View](#))If my snide comment doesn't hit home: it's how I view you.

You may PM me with real quantifiable research and information if you want to further discuss this topic. Anything beyond that is a waste of my time.

If you think the governments all over the world just use standard protocols that every other goverment is out there trying to break, its you who needs to take the tin foil hat off. Do you really think the government is going to make public exactly what algorithms they use? Yeah, didn't think so. What they say publicly and what they do behind closed doors are 2 separate things entirely. The NSA, the world's most secretive underground city beneath Fort Meade is never going to tell you or anyone else what encryption techniques they use.

A debate, where one person knows facts, and the other is speaking on topics he has absolutely no hand in.

ZeLizzard - April 3, 2021, 3:59 am

Gotta disagree, there are many vpn companies people don't talk about as they don't want others to ruin the party.

kuebiko - April 4, 2021, 11:42 am

(Mar 26, 2021 11:08 AM)Herbert Wrote: [\[CITE\]](#) But does it have military-grade encryption?

"Military-grade" isn't really a good thing. It essentially just means "Getting only what's essential for the lowest price possible".

Herbert - April 4, 2021, 11:45 am

(Apr 4, 2021 11:42 AM)kuebiko Wrote: [\[CITE\]](#) "Military-grade" isn't really a good thing. It essentially just means "Getting only what's essential for the lowest price possible".

Marketing 101.

Kasko0288 - April 5, 2021, 5:09 am

Looking for some free vpn service ? Is there any good one ?

kuebiko - April 5, 2021, 11:49 am

(Apr 4, 2021 11:45 AM)Herbert Wrote: [\[CITE\]](#) Marketing 101.

Exactly. Nobody who actually knows the meaning of the term "Military-Grade" would buy

military-grade toilet paper or military-grade first aid kits.

double - *April 7, 2021, 11:59 am*

Well, I have good experience with ProtonVPN. Even the free is rather usable then u have only IPs from 3 countries to chose from though.
