Thread: [BitRAT dont connect](#)

PingByte1337 - March 27, 2021, 3:18 am

Hey Guys,

my Test Client didnt connect to my Server. I think i have all right configured.

I see on Victim PC the Process with the right TCP Connection

- BitRAT (Test without Crypt)
- Server PC = Windows x64 10 (20H2)
- Client PC = Windows x64 10 (20H2)
- VPN = OVPN.to (with Portforwarding)

Here a lot of Screenshots from my Config.

- VPN

- Server PC

- Client PC
