Thread: [ESCAPE FROM TARKOV CARRIES](#)

chr0matic - March 27, 2021, 5:07 pm

Hello, If you play escape from tarkov and are having issues running quests or need help getting money. I am here to help. I am a lvl 43 cheater that plays on a EOD account. You have a 0 % chance at a ban. Add my discord: morgtown#4586 if you would like to talk about this. I will loot everything valuable and wipe the map if you want to hide while I do the dirty work, or you can follow me. I will tell you where all the bodies are and what bodies to loot and let you go through my bag and take what you want before extraction. Add my discord as I am not active here.

If you're fine with grinding and potential loss of gear with insane realism then yes its worth playing

To be honest, I love this game so much. Its super worth playing if your willing to spend the time and learn it. I hated it when I first started and now its all I play. Worth getting into but takes a lot of patience and not tilting.

I'm struggling with this ATM. Need to spend time learning the maps and mechanics. But I get rekt pretty early on the matches and it's just not fun to me.
