Thread: [\\$500 Need a custom circuit designed](#)

Who Soup - March 29, 2021, 5:42 pm

Looking for someone who can design a custom circuit using isolation tracks. The circuit will run off of a 3.7v power supply with 2 key elements that I would like to include. I will be milling the PCB on my own.

Needs to fit in a 3"x1"x1" rectangle.

Imk if you're able to do this.

\$500

No wanabees. I may ask for proof that you're capable of doing this.

Contacted you didn't hear back yet.

still looking for this

EDIT:

nvm, I found someone on fiver, I should have known HF couldn't do it.
