Justin - March 30, 2021, 9:08 am

We are here to prepare you to make money in the Crypto Pump & Dumps!

What PumpSniper does:

- Lifetime license. You only pay once.
- Does a buy order and sell order extremely fast (under 1 second, usually 15-200ms, depending on internet connection)
- Has a panic sell feature where you hit ESC and you'll sell instantly even if your take-profit wasn't hit.
- The bot is stored locally so your API is safe, we can't see it or use it any way, as it's stored locally in your computer.
- Is very stable and well optimized, it's only going to improve even more from here onwards.

CURRENT PRICE:

\$199 LIFETIME BINANCE

\$149 LIFETIME KUCOIN

Terms of Service:

- 1) There are no refunds. You are receiving a tool that works like intended. You are not buying a method that can work or can not work, you are buying a bot, a software digital product that simply does what it says it does.
 - 2) Middleman is accepted.
 - 3) We reserve the right to select our customers.
 - 4) We can change this ToS at anytime without prior notice.
 - 5) Payment via Crypto.
 - 6) Should be logical but I'll mention it here too: We don't guarantee profits. At all. Only play in P&D with what YOU CAN AFFORD TO LOSE.

Super interested in this. I use kucoin, any chance you have some videos showing it working/executing a trade? Am I responsible for inputting data for it to find pump and dumps?

You have to tweak your settings from each pump and dump you participate in.

Here's a video where the developer of the bot (My friend) has earned 100% on a PPT Pump organized by MEGA PUMP group, you can find them around Discord if you look around enough. There are a lot of pump and dump groups (they can be good or bad). Here's a video using the bot and making 100% profit:

I don't know looks like a scam to me. You don't guarantee any profit. Yet, video says 100% profit of 2,000 for every dump. Also pumping and dumping is illegal. I would proceed with caution since op's thread says he cannot guarantee any profit. All he is doing is selling his friends software and doesn't know if it works or not but you should take the risk of paying for it and having it not work at all for you. Just saying if you buy this and it doesn't work don't blame op just blame yourself. At least the guy is straight forward telling it may or may not work. Yet, videos posted and his friend is guaranteeing people profits.

??

We don't guarantee profits. That's right. We just offer a way to have a higher chance at EVENTUALLY Making profits.

Also, pump and dump in Crypto is currently legal. The crypto markets are not regulated enough yet to be classified as illegal. You could say the pump on GME is illegal too, lol. A lot of people just 'shilled' the GME stock and made it go crazy.

We want everyone to understand that this is practically gambling and you do it with WHAT YOU CAN AFFORD TO LOSE.

We are just offering software that helps you act inhumanly fast (a human can't act as fast as our bot) and increase your chance to win in a pump & dump in crypto.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Yeah I don't think there's much need to be cautious. Super appreciative of the video, I mean if you are trading on any exchange already, you would know programs like this can't be guaranteed but these bots are useful. I'll keep a tab on this for when I'm feeling risky
