Its very rough and raw product (i'm contracted buyer). This guy convinced me to pay him extra money (30\$ total) for "extra feautres"; i waited 2 or 3 days to receive panel, hes not hurry, he jsut telling taht we got no patience; but lol, i got uncomfortable panel which is basically useless; main thing for me was to compare hrpd function to other products, but it didn't even connect me to any of bots (there was many enough); and it looks like it even does not create hrpd on bot's side (screen <https://prnt.sc/116sl4j>); other functions are poor.

Its not user friendly, the buttons are not visible (i also asked him to fix) (screen <https://prnt.sc/116sf6t>).

I put my real bots to test this panel, and even not all bots which is coming to "connected" state appeared at "online" menu; and that is not about crypt (i have good one), that is about bags in that

panel.

I have a big patience and was trying to contact him kindly to show me right way of operate or fix, but i just received silence back (screen <https://prnt.sc/116s3tq>), so here is real feedback, i do not recommend anybody to buy it in its current condition, its just money waste, for real.
