Thread: [WillyT1998 UID=2851109 INFECTING HF USERS](#)

UnderBot - March 30, 2021, 10:57 pm

Hi! I am creating this thread because WillyT1998 (UID=2851109) has been caught infecting other HF users.

Here is the proof: <https://imgur.com/a/Ma8Dg2O>

Read the messages carefully. He social engineered him into running the crypted-client.exe I gave him and then ran Sullivan's RAT possibly on another PC or ran Sullivan's RAT for a short time before closing the connection/process.

Please be very careful when downloading anything, especially random files from anybody! He has since been removed from my RAT service, as well as removed from his RAT access.

WillyT1998 - March 31, 2021, 10:12 am

I was not aware it was my stub being used. Also, this was done off of HF and all communication was done through discord. A server which I paid for but got little to no support during my time there...Maybe if the owners would be online to help and do the 24/7 support, then this would not have happen. To continue, their stubs are not FUD.

You knew it was your stub. I have many other pictures to prove it. Also, it doesn't matter if it was done off of HF.. The fact is you contacted mutual Discord users, shared your stub with them, and SE'd into thinking you were "helping" them and in fact you were just infecting them. The sad reality is that you were attempting to infect other users of my service, but of course they're only from HF.

I also have multiple screenshots where you do not provide the service you sell/advertise.

That's some beautiful deflection there ?

Velo - March 31, 2021, 11:16 pm

+1 for OP here, just by reading the replies lol

Right. He claims I didn't provide the service, yet was using it to infect users. ???
