Vouch for xZalurex. This course is easy to understand and there's a ton of good material. It hasn't been long and I'm already learning not only what to do but how they work. Nice and great to work with too. 10/10, I'm glad I got this.

If you are going to advertise a service at least make an effort. I've found numerous of grammatical mistakes. The thread design is Anyhow make sure to have your courses up to date. Cisco updated lot of things lately.

He also has someone replying with a vouch but with no contract or proof that he bought it.

Not only that, you can easily find Cisco courses online for free that includes the exams. For example, the COMPTIA Security+ SY0-501 I just searched on Google and within 5 minutes I was on the course ready to learn.

I'm sure placing a bunch of courses together and selling them here can benefit some users, but it doesn't make sense in my view.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
