can you give me your telegram id i wanted to learn more about of HF from you. " I am New Here"

Mikutype - March 31, 2021, 11:46 am

I would like to know it if it is legit.

xZalurex - March 31, 2021, 12:14 pm

Im not sure if this is even possible, the only way i guess is if they click the link.

Yes..you may right but here you don't have to send the link in SMS you can send a link of YouTube video/any wallpaper/any images when they open it you will get their current location that's all.

yes its 100% legit nor i am not Charging any money for this.

Velo - March 31, 2021, 12:50 pm

Sure I'd like to hear it out.

Well I would like to know about it, although the tip in the right direction is welcomed already.

In exchange just ask me if you need something.

i am new here bro, so i can't pm you.

Nortogre - March 31, 2021, 3:28 pm

Interested to know more Raavan. Does it capture anything else apart from location?

Mikutype - March 31, 2021, 11:02 pm

Nevermind, I still would like to know this.

mx42 - April 1, 2021, 12:13 am

Would like to know how this works

boostedk - April 1, 2021, 6:54 am

I would like to give it a try.

And btw you should make it public because as far as I know normal users have a gap on their message box

Are you famliar with metasploit if not this will be helpful for you

Track Anyone's location by sending them a text message. :speech_balloon:

:paperclip:1. Go to Grabify:small_red_triangle_down:
(<https://grabify.link/>) & creat your account by registering.

:paperclip:2. Get the link (URL) of anything you want to send like wallpaper, music, video, etc.

:paperclip:3. Login to Grabify.

:paperclip:4. After loggin in to Grabify, go to home page. There you will see a box where you can paste url. So, paste the copied url in that box and click on Create url.

:paperclip:5. After this, URL will be created and you will be redirected to the page where you will see new URLs.

:paperclip:6. Now copy the newly generated URL or google URL (Select Anyone) and send it to that person whom you want to track. You can use any social media platform like Facebook, Whatsapp, Telegram or you can send directly to their phones as a sms.

:white_check_mark: So here we got the IP Address of the user whom you wanted to trace, now let's get some more information about him/her.

:paperclip:7. So, to get information about user, copy the IP address of that person and go to IP2Location:small_red_triangle_down:
(<https://www.ip2location.com/>) & paste IP address there.

:paperclip:8. Now just copy the Longitude and Latitude of the user that you got in the previous step and search it on Google, you will get map location.

If this is helpfull foryou please support me through The Popularity.

if Popularity is not possible you can send us bytes to

Velo - April 1, 2021, 8:21 am

Hi can you show me how to do this I've not got a clue about hacking or anything I'm using an Android also have you any idea how to do sms and calls spy without the device thanking you so much thank you

BrainDD - April 5, 2021, 5:21 pm

Seriously bro? grabbify link thats like 5 years old thing and it doesnt help; you have only their IP address.

I live in a city and my internet provider is giving me an ip of a different city, JUST TO LET YOU KNOW

Karen McMahon - April 6, 2021, 4:13 pm
