Thread: [COVID-19 vaccine passport system could soon arrive to the United States](#)

Anatoli_Smorin - March 31, 2021, 10:36 am

Imagine not being able to work, travel, or even enter a grocery store to buy food, if you haven't been vaccinated.

This is medical fascism.

N - March 31, 2021, 10:40 am

New York is getting this rolled out this week I believe. They will be rolling out a digital vaccine passport for residents.

ButtermilkJesus - March 31, 2021, 11:01 am

Hopefully I can just get a vaccine, I'll do whatever to get back to real life.

A Nobody - March 31, 2021, 11:03 am

Vaccine passports already exist, it makes sense in a way to have them. I've got no issue with it as I think anybody who can get vaccinated should.

Juoku - March 31, 2021, 12:44 pm

It's already a thing in some countries like Israel.
You're being "raped" into getting this vaccine.

Voxi - March 31, 2021, 12:56 pm

There has been talks about it here also (UK).

They're also thinking about making us have proof that we've had the vaccine to go to restaurants and pubs.

Anatoli_Smorin - March 31, 2021, 1:09 pm

They are going to require proof of vaccination for basic employment, and even to travel locally.

Armed government checkpoints will be everywhere, and you will need to "show your papers" in order to be allowed through.

There is even talk of people refusing the vaccine to be criminally charged with terrorism-related offenses.

protege - March 31, 2021, 5:07 pm

Not to be that person but kinda sounds like bible end times. You'll have to obtain the mark of the beast to do certain things like buy/sell

Yanix - March 31, 2021, 5:54 pm

We are still waiting for the vaccines to arrive in our place and waiting for our turn to have it...right

now the medical frontliners are the ones who are having the vaccines then the senior citizens.

SIM-4923173 - March 31, 2021, 6:17 pm

how is that a crime? That right there trumps over our freedom. What about people who cannot take the vaccine?

I even heard some people say that the vaccine has dna alternation code and the aliens that visit us is of us in the future warning us to now take it and if we do take it to at least new allow world war 3 to start cuz they claim world war 3 starts and we get blown into the dark ages. Which with all this crap happening looks like we are already heading to that direction.

Geass - March 31, 2021, 6:22 pm

They take your freedom and force you to put something inside your body for "your safety," this is the most retarded thing they thought.

Because I read lot's of articles regarding the vaccine you CAN get infected but without (or with low) symptoms, so you can infect others, this is supposed to be for your safety.

I prefer to live my life by ordering online, even groceries then putting that shit in my body with the way it's trying to be forced only suspicious it looks.

Nate - March 31, 2021, 6:30 pm

Shit I mean I could really careless, I mean I'm already gonna get the vaccine

Andrew - March 31, 2021, 6:49 pm

Damn bro they actually crazy with it

Anatoli_Smorin - March 31, 2021, 9:06 pm

I've heard stories of people who have taken the vaccine suffering severe and adverse reactions, ending up in the hospital with things like blood clots, brain hemorrhages, etc..

Some people have even died shortly after receiving the jab.

Furthermore, mRNA vaccines alter your DNA and can cause cancer in the long-term.

No thanks, I would rather have CV19 than take that shot.

The case fatality rate for CV19 is between 0.25% and 1.5%, and the mainstream media was treating it like it was the "captain trips" super-flu from Stephen King's novel The Stand.

It is not.

Also, in 2018, more than 2,500,000 people died (worldwide) from Tuberculosis, and you never heard about it.

Neon™ - April 1, 2021, 3:16 am

I'm waiting for this passport for so long... hopefully we'll get it soon here as well.

siddy357 - April 1, 2021, 3:34 am

There's a lot of points in your post that are easily disproven, but it doesn't like you'd be open to them. Instead, I'm going to ask, in what world do you live in where people haven't heard of tuberculosis??
