Thread: [Code Exploit for Magento](#)

Satan Himself - April 1, 2021, 4:49 am

I need a couple Magento 2.1.6 exploits coded, there are multiple CVE reports out and the CMS is opensource. Take a look at a couple of the CVE reports and tell me how much about per exploit, I may buy 3.

hello mate , i have checked the version you mentioned and what i found was just 1 unauthenticated vulnerability and you can't do much with it and the SQL injection one , but do you think your able to crack the password if it's done for you ?

I have admin access, I am looking for a RCE. Please send me a PM.

???
