Thread: [Strange link vulnerable to SQL injection](#)

Th3Gh0st_Ma - April 1, 2021, 5:22 am

sometimes I face this kind of link it's vulnerable but where can I find the inject point
www.biomed.unipd.it/research-areas/computational-and-structural-biology/biocomputing-up/openings/

i didn't visit your target but in this case there are multiple ways to start injecting like, if you got blind or time based injection you can do it after / 1 OR '1'=1--

or you can inject in header request " use burpsuite for proxy fuzzing "
