Is it possible to spam somebody's chat, like have like 20 different accounts spam a username but have each one say a different username and keep spamming it? Like the first account have it spam "Crust" and then the second account spams "Crust1" etc.... If so I'm interested and give me a PM.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Currently dealing with the user for a view bot package.

After some struggle and some development issues, the OP has provided me with some compensation for the situation. He and his team clearly went far out of their way to fix my issue and the view bot is working as described, it's fast (yet gradually increases viewers) and stable. Got my affiliate status without any issues.

Thanks op!
