Thread: [Where is the Facebook data breach available?](#)

Indelible - April 4, 2021, 9:40 am

There are tons of news sources talking about how Facebook's data got hacked and released online yesterday but it doesn't seem to be available anywhere online. Does anyone know where it could be found?

I'm also interested... Would need to know if I have been compromised ;)

Just Google it.

Don't wanna type the whole domain here since it's most likely gonna give me a warning.
Found it pretty quick by going to this site. Thanks a bunch

No one gives a rat's ass about your gloating.

You cannot "find" it "very quickly" ..did you pay and upgrade your account there..add that it is not free.

By "find" I meant I located where it was at. Tried to make an account but didn't get "admin approval" so couldn't get the dataset.

You can find it on RaidForums. Pretty sure that's where GnosticPlayers, or what's left of them hang

out.

Maybe you should shut the hell up and read the rules before posting.

Google and most search engines shadowed the results. Question: Does this kid wana be hacked by just asking for links and torrents. He can surely continue if he is using a junk pc and has no other devices linked to his internet. Then he can instal his OS from the bios.
