Hi all, I'm sure I'll remember some posts I made, but I cannot for the life of me remember my old HF username.

I was all in the botnet scene at the time, some XBL gamer tags I had were: AdR XpLiCit, Scrubbyyyyyyy, Hizie, Trapapotamus.

Just wanted to get that out there, what all has changed?

If it had been 7 years since you last logged in, your account may have been removed (blame GDPR).

Welcome back. SO MUCH has changed. Too much to list. Take a bit to look around.
