Thread: [SELLING DISCORD WORM | USB SPREAD | SHORTCUT EXPLOIT | SPREAD YOUR RAT! EASY CLIENTS](#)

zxPhantomBlade - April 4, 2021, 3:20 pm

Hello im selling my discord worm project which I coded.

Basically what it does it messages all the discord friends of the victim with the given payload URL so you can get a very high amount of clients with this if you use it right!

Features of the Worm:

- AntiVM
- AntiSandbox
- USB Spreading (Infects all files with your payload)
- ZIP File infection (Infect ZIP files with a shortcut exploit to prevent losing your clients! Replaces ZIP files in Desktop, Downloads, Documents and more!)
- Works with every discord account. Not verified and also verified (with 2fa)
- Simple but powerful!

Video to get better insight look on how the worm works

imho 300 is too steep as the code behind it isn't the most complex, however since it can be incredibly potent if done right, It's understandable as to why you chose that price. I'm not going to tell

you how to sell your product, but a light price drop could make it have better sales. Then again I could be very wrong lol.

GLWS.

I agree, he should make the price a bit lower to make it worth it

Yeah im releasing a new version soon with a full builder for half the price. Release will probably be today :). I agree that I overpriced it
