Nice tool bud, looks pretty clean and quick results :)

It isn't accurate.

Tried using it, told me my chosen name was available and that it was "cleaned up 26 days ago" I go to register it and it's taken.

Nate - April 5, 2021, 2:23 pm

How do you know when it will be available

Riot calculates it from 2 things. Account Last Active (Login, Summoner Name Change, Icon Change etc) or Last Match. So I take both of those, see which one is greater and calculate from there.

Its currently:-

Level 1 - 6: 6 months of protection
Then 1 Month per Level Afterwards (capping out at 30 months)

PHP Code

```
<?php
function CalculateNameExpiry($summonerLevel, $lastMatchDate){
    $protectionMonths = 6;

    if($summonerLevel < 6){
        $protectionMonths = 6;
    } else {

        // Level 30 for Max Immunity
        $protectionMonths = $summonerLevel;

        if($protectionMonths > 30) {
            $protectionMonths = 30;
        }
    }

    $unixStamp = $protectionMonths * 2629743;
    $accountExpiry = $lastMatchDate + $unixStamp;
    return $accountExpiry;
}
```

Can you PM me the name? All my data is from Riot itself.

You can also get false results from prohibited names such as Sex, Fuck etc.

And if an account was banned with a name that name is no longer available at all unless you ask Riot support.

I remember when my friend sniped "Yasuo" and Riot took it from him and gave him 10k RP instead lmao

I think you can take Champion Names again. Although I'm not sure.

Appreciate this. I used to use one back around S6 to snipe OG names and resale but the time for that has gone and passed unfortunately. I will use this and recommend it to people who use the in-client name thing which is shit. I have a few people asking me for names and I don't sell anymore so I'll push them this direction lol.

I'd greatly appreciate that man. I sell all my names at decent prices too £3.49 - £14.99. Don't want to take advantage of people.

Very cool tool!

Appreciate the share.

Lion - May 5, 2021, 12:04 pm

Someone named "Sarah" and some other kids snipe every good name upon release. If you can create a sniper that can compete with them I will purchase it off of you. I don't even want names to sell, I just have a lot of smurf accounts.

Its very very easy to code. I'm just too lazy haha. You can calculate the names release down to the second I believe. So all you'd need is a bot to claim the names. (Which I haven't looked into personally lol)

With an approved API key you could spam check names really fast. League names are really not worth too much regardless of what people try to sell you so its genuinely not worth it.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
