Thread: [moderators contracts?](#)

-Nerotic- - April 5, 2021, 11:19 am

I was grave digging as a pastime as I was bored, Just looking not posting. saw Omni post something about "having new moderators sign contracts." what would this be i wonder.

i honestly don't know what could be in it.

Maybe a NDA or something?

(Aug 11, 2008 08:41 PM)Omniscient Wrote: [\[CITE\]](#) I think it's more important the site is secure and that any new mods are more trustworthy. I am not even sure I can achieve this. I will also be taking extra measures and having new moderators sign contracts. I won't be assigning anyone under 18 in that case to a moderator position.

I would be better off with no mods than ones who are malicious.

Used to be a moderator/game operator for a few other websites, basically what they did was some kind of contract that prevented misuse of powers. In case you would abuse any privileged system, you'd be able to receive fines up to an X amount. Also included an NDA on anything others wouldn't be able to see.

Wouldn't be too surprised if Omni implemented something similar.

Also, probably would be better to put this in RANF as a Policy Q if you want an answer from the staff.
