Thread: [\[Method\] Step by Step - 100% afk - telegram script](#)

Hey guys

I just wanted to share my new method.

The good thing with this method is, that you can run it on a e.g. second monitor on a tab and still can work at your computer while script is running! :)

This script will watch ADs for you.

These ADs get you like 5-20cents? every 30 seconds.

if you are interested here you go:

replace the first to "xx" with "tt" :)

Enjoy :)
