Absolutely disagree. When talking about adult traffic, the consistency of buyers and lack of dick pics is superior to most other sources of traffic. IMO.

Heya! Interested in your reddit knowledge, seems like you know your stuff. I've experimented a lot with reddit as well and even have my own Reddit post scheduling server set up. If you see me as eligible, hmu about a vouch copy. I've been through many different traffic sources like thousand dollar [BRAND NAME REMOVED] bots and even dabbling in things like upvote manipulation so I believe I'd be a good candidate to write a thorough review for you.

Asking for a vouch when nothing is listed on the thread is a marketplace violation. Also clearly there are 3 pages of the thread, including contracted customers. Why would I be offering a vouch?

Stanley - June 2, 2021, 8:10 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Obviously that relies on how you use the tool. If you're using it to spam 50 subreddits every hour you'll probably be getting banned a lot more than if you were just automating instead of spamming.

Hi,

This method still performs. I've updated a lot of the processes to allow for easier automation, usability, runtime and more. Reddit gets a lot of traffic, utilising this is certainly worthwhile. Not having to deal with actually using Reddit makes life a lot easier. You can be pulling hundreds of adds to your snapchat daily. (I recommend SC, but you can obviously drive the traffic wherever)

There are no set-up fees required outside of using a Linux VPS (probably recommend, but Windows WSL works too) however this is not a costly purchase given the cloud platforms we have today. (5\$ per month maybe?)

Please feel free to ask me any further questions.
