Thread: [8 Ball Pool Tool | IOS & ANDROID | NO JAILBREAK OR ROOT](#)

WithDraco - April 7, 2021, 10:52 am

I am looking to start selling a 8 ball pool tool with long lines alongside a AUTO SHOOT option that finds the best shot for you and shoots for you. It is undetected on all 8 ball pool servers. If anyone would be interested please comment down below and let me know before I see if it's even worth selling on here.

Auto shoot would be great.

I'd use it.

Keep me updated.

How far are you with completing?

I'm interested!

Very interested depending on pricing. I got sick of losing so downloaded a modded apk with long lines and they deceted me and took all my balance. :(

MrKamarJ - April 8, 2021, 8:22 am

Depending on pricing, i'd be interested in this merely for the auto shoot function. Would love more details!

OMARATION - April 8, 2021, 9:50 am

Depends on the pricing and if its acc no jailbreak needed.

Pricing would be about \$5 a day, and \$60 a month. It's very difficult to find something like this right now and you can easily make millions if not billions of coins using the auto shoot option which basically wins you every single game. So far I have made over 3.2 billion after playing berlin over and over and over again. It in fact is NO JAILBREAK, all you have to do is plug your phone into your computer and connect with itunes, and then the app will be installed using the launcher.

When will this be released?

Publicly? Beta testing?

It has been finished for over a month and there are a few users using this at the moment. No bans or anything. I will most likely start to sell as early as I can get my thread design done. If you would like to purchase early, PM me your discord and I will add you.

But I am interested in this after seeing a couple purchases .

Sounds good, I was just trying to get in contact him. Why is it that I cannot post my discord on this forum?

Because you're not allowed to post non-verified Discord information.

Verify your Discord through your user profile and then you can do something about it.

I vouch for OP. This really does work and is 100% Jailbreak free.

Setup took me 5 minutes max and I've been wrecking every single game and my coinage has gone through the roof now.

I seriously recommend this to anyone who plays 8pool or wants to grind them points.

I will be purchasing now after buying a day key!

This cheat is made by cheto.io. OP didn't make it, he is just a reseller. Price is \$60/Month. They sell nonJB PUBG, CODM and 8BP cheats and they are all detected so don't waste your money.
