Looking for an expert hacker to help me gain access to a Facebook messenger account. Simple job with payment of BTC.

Please be aware of my following conditions before starting:

1. Will either go through black hat escrow or will need proof of access before payment (thank the scammers for that)
2. Looking for a quick turn around with someone who knows what they are doing
3. I have been told this account is easy to comprise using a RAT, therefore it will be on first come first serve

I have an extensive budget with the coins ready to go. But please come with reasonable prices.

Requesting to commit a felony and use your real email address as contact will get you arrested, charged and surely not get what you want done.
