i've been searching for good sources of traffic and it seems that they're hard to find.

i searched in here but all the sites are outdated or doesn't work.

i've been lookin' for traffic on chat-avenue but all the guys there are time wasters and looking for conversations and free nudes.

Dating sites in general I'd say, but I've heard [BRAND NAME REMOVED] is burnt. < probably not true though

[BRAND NAME REMOVED] and Reddit is probably the most HQ you can get. I've been able to make custom bots for smaller sites and apps but it's much harder to convert.

It's burnt for snap usernames that have been perma banned, there are ways you can generate hq [BRAND NAME REMOVED] traffic still
