That's because his thread design is an mp4 and not a gif lol.

It wouldn't show up in post. Just save to GIF and replace URL.

Got videos of the bot in action btw?

If you would like a demo I can give you one on discord

SIM-2908357 - April 10, 2021, 4:28 pm

This sounds like an interesting project. Did you code this yourself?
If you can pm more info I'd appreciate that.

Tremorz - April 10, 2021, 4:34 pm

Pricing? Just curious.. thanks

Swip3r - April 10, 2021, 4:37 pm

Damn is this the new meta of botting? Shoot me more info if you have a chance.

Rev - April 10, 2021, 6:33 pm

You're leaving people with too many questions you should clear up in your main post.

Mobile bots aren't anything new so, what is special about yours? What makes it different? How much are you charging? etc

I would be interested if brings something new to the botting scene, as like I said, mobile bots existed for years now.

Sanchez Sales - May 5, 2021, 8:41 am

OSMB is based off using an emulator. Coded in Java, it is not just a mouse recorder or color dependent ahk script, The developer just released Tithe farm beta, and will soon be releasing mirror mode as it is currently being developed and will assist in resource usage. It can currently be ran on windows and mac, my self have gained quite the level gains from OSMB, if you have more questions I'm available on discord more than HF, Rick Sanchez#2193
