- The cost of information inside my ebook is \$90.

Do you guarantee that I will get ROI from your 1 token?

- You need have Binance Coin(BNB)

What device do I need to apply your method?

IMPORTANT: I am selling information on how to find good token opportunities by buying during a sale price. I do not sell the results to make money, the result comes from taking action about the information you have and that's something I simply cannot force anyone to do. Only invest what you can afford to lose.

Nice sales pitch OP but I don't think the information given is worth that much. Although this may not be what's in the guide, as free resources, it can help anyone learn about crypto currency trends and capitalize on upcoming trends / airdrops;

1. Coinmarketcap
2. Airdrops.io

Of course, always do your due diligence. Again, this IS NOT affiliated with OPs post, but I think it'll help a few people interested. Glws.

hosmail - April 11, 2021, 12:30 am

My official review of the product.

I received a vouch copy and invested around 100\$ in like 8 different coins.

Vocabulary, Grammar & Interface :

It's a simple e-book with pictures added to make it easier for any beginner to buy coins which are not listed on mainstream exchanges like Binance and KuCoin. It's easy to read and understand.

All in all a simple 5-10 minute read with decent font sizing which doesn't hurt the eye.

Performing the steps given would take a lil longer but it's nothing big since OP has included a video link as well which makes it easier for you to follow in case you don't understand the text written.

Seller's responsiveness:

Contacted the seller through HackForums PM system and replied almost immediately. OP also uses discord and is available almost all the time on discord and is really responsive with anything you throw at him. Moreover sounds like the OP has been in the Crypto Industry for a decent amount of time for him to guide you in case you find any problems.

Profitability:

Well I'll be updating this review with screenshots soon but for now I can't talk about the profitability since it's just been a day and I need at-least a month to see some decent changes in coin pricing. But I'm sure at the end you will be profitable on like 7/10 coins you invest in since the market looks real bullish atm.

Overall:

I would say this is an e-book for beginners who want to just get into the altcoin space and learn how to invest wisely saving you the hassle of going on the internet and googling how to do the same.

OP also has given a site which helps you to find very new tokens which has just entered the market and ones which are trending which is a valuable addition to this e-book. (Tried googling to find the site using basic keywords but didn't show up so this site should be a goldmine imo).

This is finally Cryptocurrency everyone. DYOR before getting into it and use proper risk management to minimize losses ?. You are prone to lose a bit but the gains should cover up for your losses and help you make more.

I'd give this a 9/10 for beginners who are just starting out in the Crypto market.

Thank you and Good Luck With Sales OP.

Regards,
Hosmail

Getting information about a new token or alt coin is not only being seen in coinmarketcap.com or

airdrops.io. There are some other websites out there where you can see a token that is trending and in sale price. It is like being an early holder of tokens that are not yet listed in coinmarketcap.com.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
