Thread: [Previous message on UP keyboard press in chat.](#)

Tor - April 11, 2021, 11:34 am

My idea is to be able to get last message when I press up key in chat.

Do you also want to be able to edit your previous message or just "get it back" on UP and send it again, possibly corrected?

I've tried to do this too, and failed. I'd like it, but not sure if they'd be down for it. I understand justifications for both, but it would be nice.

Send it again possible corrected I think its better in a way then editing the last message you sent for numerous reasons.

It's up to the stuff members. We will see.

If mambers want it, stuff members could definitely consider it :p

Also, if Xerotic doesn't add this feature to HF Convo, I'll implement it in [mention=1306528] 's HFX 2.0 addon as it doesn't require any special stuff, because you wouldn't actually edit your last message, just resend it again with your edits. Consider it as it's done. Yes, it was when I woke up & forgot to recheck and fix the typo.
