Thread: [Monkey playing MindPong](#)

Zero - April 11, 2021, 1:12 pm

They first installed the chip and let him play using a joystick. They studied his brain activity for 6 weeks till he was finally able to play games with his mind only.

This is a big step.

Grim - April 11, 2021, 1:20 pm

well now its official im 100% convinced elon is taking over the world. if they can do this with monkeys just think when everyone has one of these in their brain he can control everyone haha

Utility - April 11, 2021, 1:31 pm

Can't wait till full dive VR.

severos - April 11, 2021, 10:46 pm

We all know where that's going, just avoid the first generation XD

OP your title says "Money playing MindPong" which surprised me at first <.<

Nate - April 11, 2021, 11:36 pm

awesome share zero, ia ctually enjoyedit

Don't we already?

oop - April 12, 2021, 7:28 am

smart monkeh! This is adorable yet extremely impressive at the same time

Parks - April 12, 2021, 7:42 am

Have any of you guys seen the 80s movie Project X with Matthew Broderick?

There is chimps flying air force jets...

Zero - April 12, 2021, 7:47 am

The point is not the monkey. It's the chip reading your brain.

Parks - April 12, 2021, 7:49 am

Yeah they had chips in their brain too...

Then the airforce after training them successfully on fighter jet flying, put them in a radiation room to see how long they live incase WW3 happens so we can know how long we have to make it Russia before dying.

:P

Either way this is still quite the accomplishment.. I do feel sus about the speed Neuralink is going already though. Might just be some media hype driven content. This has been accomplished before but with wiring/ This is the first time being wireless and transmitting, still pretty cool and something to be proud of.

so the gist is we are going to be used as a robot instead of making one in future.

A Nobody - April 12, 2021, 6:15 pm

This is pretty crazy and super interesting.

Zero - April 12, 2021, 10:10 pm

This is not meant to control you.

Why did we let GPS tracker and data collectors be a thing and we carry them with us willingly everywhere? Same concept.

Neon™ - April 13, 2021, 3:17 am

Wow I saw someone share this in convo but I didn't watch till now, impressive stuff.

You're late, we have already taken jabs which connects us to 6G cell towers controlled by Bill. /s

Luckii - April 13, 2021, 9:04 am

Elon is actually something else, this man is steady wildin

Zero - April 13, 2021, 9:04 am

I already have 9G chip in my brain.

TB12 - April 13, 2021, 11:08 am

How did Kong lose god dammit

??¢??? - April 13, 2021, 12:07 pm

i Saw this, this is amazing. i can only imagine the possibilities. We could program paralyzed people

to rob the banks

Captain Pre - April 13, 2021, 12:15 pm

My head hurts seeing this. Incredible how tech like these is now available in the real world.

Life in the future is going to get much more complicated. Don't know if I should be worried or happy

Vouch for this, when are we starting production on the anti-mind control chips? :P

Zero - April 14, 2021, 2:10 am

They already control us with media and smartphones.

Same as we all use our smartphones at some point we will all have this.

I like the idea of me downloading Japanese in 3 minutes to learn it.

but what if the servers get h4cked and it force downloads the mind control program ?

What if your Tesla gets hacked mid driving?

You're right that it's gonna be a big issue. My point is that we already have these issues around us.

Harry Manback - April 14, 2021, 2:50 am

That is. One of the most badass things. I have ever witnessed.

bk randy - April 14, 2021, 1:17 pm

Well, you should probably be investing in this tech, it only cost 5grand to have the chip installed and ready to download your favorite skills :)

I've honestly considered it, it already has some kind of fda approval. This is the biggest break through of tech since computers were designed!

Carl - April 15, 2021, 6:41 am

Elon taking us to the next gen! I support him
