ANY ADVISE ON A RAT WHICH SUPPORTS LIVE AUDIO STREAMING.
HAVE TRIED QUASAR AND ASYNC BUT NONE OF THEM HAVE AUDIO SHARING.
ANY ADVICES WOULD BE WELCOMED.

If that is what you're looking for then BitRAT has this feature.

if you're talking about microphone audio streaming, then there's a plethora of RATs with that feature, in fact your question should be "is there any RATs which don't have audio streaming"
but if you're talking about speakers audio streaming, well that's what I have been looking for for many months now and I have yet to find solution.
hopefully someone here will help us with that
