Thread: [Any way to access iCloud if I have access to the email \(gmail\) ?](#)

**eldios7** - April 12, 2021, 8:00 pm

I was wondering if it would be possible to access iCloud files from an iPhone if I have full access to the email?

Does the account use 2FA? Do you have the phone number related to the account? What's your experience with Social Engineering?

More info required.

I would have no idea if it uses 2FA, but the person is not very tech savvy so I wouldn't be surprised if not. I have no experience with social engineering.

Any help is appreciated!

Assuming you mean the real email, yeah of course you can just reset the password and then log in.

This. As long as 2FA is not on you're golden.
