Thread: [Help in registration to Facebook](#)

**SIM-1921032** - April 13, 2021, 7:38 am

I am trying to bot Facebook but I keep failing I tried many temp emails and still nothing. Also different VPN still nothing. I instant get disabled after I type the activation code.

Any suggestion???

Well, for starters.. you can't use temporary emails and expect results on a site like Facebook..

This, and other things, i.e. repeating patterns in your profile details, maybe the ip addresses are flagged for prior spam activities, maybe vary Useragent, maybe somekind of Hardware/Browser fingerprint is generated which needs change for each account. Just to name a few possible sources.

Cheers, Gee.

I cant use [censored] becuz all of them are blocked somehow by Facebook or Instragram... I cant use private numbers from website becuz they are also blocked somehow while nobody even used them. I cant use Proxies becuz they are blocked somehow also Google block it aswell. I have no idea how to be anynomous anymore to pretend you are not. This whole situtation is terrible now. We are all tracked down.

Down...

Well why would facebook ban you so hard? That is really awful!

multiple accounts I created but somehow They marked my devices and IP. I keep checking wat data Instagram and Facebook store and I found device id and many other keys in shared data and Im 100% thats why they detect me. I have no idea how to fake the device...

**pwners** - April 17, 2021, 10:57 am

Make a temporary Gmail account and a fake name

**SIM-1921032** - April 17, 2021, 12:31 pm
