Very good write up. Looking forward to Neo3

1eye - April 14, 2021, 4:32 pm

So 3 years+ & there are still 0 applications on it by people who aren't getting paid to build. 100% the future of France

FYI this shit will go up bc 10IQ apes will ape -> number go up -> 20IQ apes join etc etc

There's flamingo.finance, the gateway for DeFi on NEO

1eye - April 18, 2021, 3:06 am

1) no one uses that

2) nice GUI, it's like 6 months old at least now if I'm not mistaken
<https://i.gyazo.com/415fa5aea37a1a668362c15bee197619.mp4>

3) I work on onchain applications & can fully vouch idc about this chain cus it's wack

1 - I use it, so do many others. Just recently it achieved US\$250M in liquidity. If that is "no one", then f*ck me.

2 - Not sure how this is a concern. Every project in in development. Having a GUI that is six months old is not a reason to be concerned. Projects don't magically appear and have years of development just like that.

3 - Doesn't seem like it.

200.000 tx/day
\$330 mio liquidity provided
\$44 mio trading volume in the last 24 hours

GUI works perfectly fine for me but whatever..

I don't understand your third point.

1 - Just like in 2017, they market this shit super hard to get the asians to buy but fr 250M in liquidity is deffo not a lot in this type of market.

2 - A GUI deffo is not everything but lets be real here name me 1 of the big boy firms that has capital in flamingo or NEO? Not those shitty ones that no one has heard about

3 - I mostly work with solana, but sure

If you know anything about Neo you'd know that absolutely no effort was put into marketing until

they had a working product.
