Thread: [Intel's new AI recognizes and filters "hate speech"](#)

Anatoli_Smorin - April 15, 2021, 11:49 pm

Intel has a new AI that automatically filters "hate speech",

A Nobody - April 16, 2021, 4:29 am

Hm. Wonder how extreme that filter will become.

Dangerous when corporations get to decide what is and isn't hate speech.

"Hate speech" is very broadly interpreted.

Also, in the United States of America, so called "hate speech" is protected under the 1st amendment.

My worry is that this would go too far and start censoring the smallest of things

Exactly.

It's ripe for abuse.

It seems like Intel is looking for a way to get out of the shadow of AMD. Can't say I agree with this new implementation of AI though.

Especially when these types of things don't take context into their decisions.

Lindros - April 16, 2021, 6:22 pm

This is ridiculous and pathetic. It's just aimed at control, to prevent and monitor pushback from the government's clear race based, anti white and pro feminist agendas.

Anatoli_Smorin - April 17, 2021, 12:48 am

What's next? All computers must have a wokeness-enforcing AI installed into them?

Until people commit acts of violence on someone and justify it by saying they were using hate speech.

Nobody read the article lol. This doesn't stop you from shouting your gamer words, it's for people who don't want to hear it.

Alex J - April 23, 2021, 9:40 am

Shoot, what else that can't be done by Artificial intelligence!

theghostofgreen - April 23, 2021, 4:43 pm

Now you can scale to exactly the amount of abuse you crave

******* - April 23, 2021, 5:15 pm

We cant keep breeding people without freedom of speech , everyone should be able to freely express their opinion unless it is verbal assault or terroristic threats.

Ninja™ - April 23, 2021, 6:18 pm

It will be destroyed as internet has a habit of doing so.

In the United States, the only limit to free speech is that you cannot incite or threaten violence.

Lyralei - April 23, 2021, 11:47 pm

So much for freedom of speech, I guess.

grainy - April 24, 2021, 1:46 am

I've seen someone cover this topic on youtube, but it seems so weird that you can just filter the amount of racism you want to have. What even is 'some' racism lmao.
