Thread: [Need to cash out \\$20k, what crypto to hold?](#)

Ruggzee - April 16, 2021, 7:37 am

To elaborate, I'm cashing out \$20k from my poker account. They only cash out via crypto. Any recommendations on which coin to pull out with? Must be a more main stream coin, as my site doesn't have everything.

\$\$\$ will sit for sometime, just looking for advice. BTC? ETH? Etc?

Thanks :)

Ace Boogie - April 16, 2021, 7:43 am

If it has to be mainstream why not stick to the two you mentioned? BTC and ETH. Split it in half if you want.

Ruggzee - April 16, 2021, 7:45 am

I mean there's a ton more than that. 30+ cryptos. Was just mentioning top 2 (in my mind).

trashy - April 16, 2021, 7:48 am

It depends on when are you going to sell. Low risk is always btc, but some altcoin could make you more money, but more risky. For that amount of money ill say btc until you get to know a coin you really believe and like its technology

Yeah it's sad, I own BTC ATMs for a living, and don't know as much about other cryptos then I'd like to. I'm looking for a coin with lower risk but still some type of small gains. Not after tether. And I know Btc climbs slowly, just hate that I could see a drop come and then forced to sit longer.

Story of the game, just trying to be careful. I'm a wimp.

Millionareby30 - April 16, 2021, 7:51 am

Split it up:

8k ADA
3k AVAX
3K DOT
2K BNB
2K ETH
2K THETA

BTC give lowest roi you guys don't learn anything.

I don't see how ada will not get to 10\$ at the end of the bull market. and Bnb to \$1000 and Theta to

\$60

These are safest lowest risk projects.

Windows - April 16, 2021, 8:00 am

Honestly I would put it all in LTC or XMR. They both have crazy potential, maybe split it up and put \$10k in each.

I like ETH too but eh idk at the price its at rn... there's gonna be a pullback, plus there is like unlimited supply of ETH.

EDIT: Also LTC and XMR have been around ever since BTC was around and are still doing great now. That's honestly a safe investment imo than spending all that on some coins that are never gonna have potential.

Dorrance - April 16, 2021, 8:39 am

Are you looking to invest? Go ahead cash out big 5.

I suggest LTC or XMR

Omniscient - April 16, 2021, 8:45 am

From poker site. I'd go with XMR if you can.

Linux X - April 16, 2021, 9:21 am

ETH is the right choice!!!

^ & after grab yourself a nice bag of ENJ.

Recon12345 - April 16, 2021, 12:41 pm

XMR and then buy VET or Cardano. Solid choices.

PitbullIT0r - April 16, 2021, 12:45 pm

Im holding VET (VeChain) and for now im really really satisfied.

BaldCunt - April 16, 2021, 12:48 pm

TRON. - TRX

Won't regret it.

Omniscient - April 16, 2021, 6:15 pm

\$20k is enough to invest equally into 4-5 cryptos.

BTC

XMR

ETH

LTC

ENJ

Tommie R - April 17, 2021, 7:52 am

You can't go wrong with 80/20 in BTC/ETH, tbh.

Frukt - April 17, 2021, 8:45 am

This is the only real answer, go with this OP!

LSD - April 17, 2021, 10:36 am

I would choose Monero and BTC.

Punny - April 17, 2021, 11:11 am

Doge coin to the moon mna

I've heard great things about VET. What price did you get in?

PitbullT0r - April 17, 2021, 1:26 pm

Bought it for 0,048\$ and now is 0.2417\$, big profit this month with VET.
