What you think about that Coin? I just readed the project and looks really interesting and legit, let me know.

Yeah I bought at 0.03 cents still holding. It's one of my biggest winners.

Pretty solid.

I'm jumping out at 0.50.

Lots of room to grow. It's a solid project working on an important matter having strong contracts (Renault, BMW and Walmart, to name a few big ones). Their Proof of Authority 2.0 coming out in a month or so, as they launched it on testnet just recently (few days ago).

Has yet to be listed on CB. Unless the bear market starts, I can see VET hitting 1\$, possibly 2\$ if they do some smart marketing. Not selling under 1\$ tho.

I did a nice swing trade yesterday & only held for just over 24hrs. I got in at 0.1823, got out at 0.235 and it pumped a little more before dipping. I might buy back in if it goes below 0.20

Thanks everybody for the replies, im looking to sell when reach 0.50.

Bumping this because I believe this is undervalued.

I bought this slightly after its ICO in 2017 when it was still called VEN.
