Thread: [AWS Panels / HQ SMS/ Email Leads / SMS API / SMTP etc.](#)

TearzZ - April 18, 2021, 2:13 am

Yo. So i have a few hundred Amazon AWS panels for sale. As well as some other SMTP and SMS API logins. HQ leads and more products coming daily. Once I get organized and upload them. Its all on my shop. 2 VCs for high rep members only to prove the logins are valid. Be aware. This is simply a login to Amazon AWS panel/dashboard. This is not guaranteed to have an instance of say Amazon SES on it. It may it may not, but you can surely deploy one. I can point you in the right direction but I wont do it for you. You have to realize. Amazon AWS is taught in MULTIPLE 4 year degrees and still not all of it will be covered. Its a very advanced, expansive platform so do your research. Thanks!

Anyways. MM welcome, message me for info

This guy is a scammer, stay away.
Didn't go through escrow so it's all my fault.

Did you use a contract? ? It's sad to see so many scams around us.
