Thread: [PRIVATE CRYPTING || .NET && NATIVE || PROCESS INJECTION || UNIQUE STUB || BYPASS AMSI](#)

?BADMAN? - April 20, 2021, 3:31 am

All Crypts are hand-made.

You are buying a single crypt not a builder.

All sales are final and no refunds will be given unless something is faulty from my side.

99.9% of the tools are compatible

You have to state which software and what kind of software you want to encrypt , fraud software are disallowed.

I will guarantee that it will bypass SCANTIME/RUNTIME the WINDOWS DEFENDER but not for any other AV and there is no guarantee as for how much time your file will stay undetected.

Can you crypt bitrat stub?

Luna333 - April 30, 2021, 8:02 pm

(Apr 30, 2021 10:52 AM)Luuna Wrote: [\[CITE\]](#) why would you advertise this when the clear functionality of your product is a crypter yet you say no malicious/blackhat activities. this confuses me. but cool service man!

Then make your own and stop complaining, Some users here just need to protect their software from being analyzed to prevent their code from being used.

Clearly you want to use the crypter for malicious intent.

Go find someone else to risk their asses for you which most if not all won't even consider. ????

Should PM OP to check this out. Might even do you the favor {Free Crypt Maybe ??} to confirm it 100% works with his crypter.

Just test out both the Regular stub and the Tor Enabled one to be 100% of his services have a great day.

Only if your build works only at localhost.

Your service looks good but there are no reviews.

We need to know what we are giving money for and what we will get for it.

Will the full potential of your hand made crypt be seen on the localhost?

You will get the same results.

The only difference is that you will get connections only from same machine.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
