Thread: [Bitcoin transaction still unconfirmed after few days](#)

Cyam - April 22, 2021, 6:57 am

Anyone else experiencing unconfirmed transaction? I was withdrawing about \$570 (\$70 for fees) and it's still unconfirmed after 4 days. Is there anything I can do to further accelerate it? Tried BTCNitro to no avail.

Xen - April 22, 2021, 7:16 am

Hackforums has a Bitcoin Transaction Accelerator in Hacker Tools. I had a smaller transaction of \$30 take about 5-10 hours to process.

Can you link it?

Sure, <https://hackforums.net/tools.php?action=bitcoinaccelerator>

Cyam - April 22, 2021, 7:43 am

Nevermind guys, I just checked to see it confirmed. Thank you for your help!

(Apr 22, 2021 08:14 AM)James Wrote: [\[CITE\]](#) I made a Bitcoin transaction accelerator that tells you whether the rebroadcast was successful or not. It's the only one that does that.

<https://acceleratebtc.com>

Most accelerators fail to send a lot of their rebroadcasts despite saying they succeeded. Mine is the only truthful one.

Great stuff. I bookmarked it, but I hope I won't need it ?

have same issue right now sent from a hard wallet .. Never happen now its been 3 days

Omniscient - April 23, 2021, 7:41 pm

mempool finally easing up....

We were at 200k transactions and now it's 150k. Hoping by Sunday we're down to 50-70k which is still high and expensive to use Bitcoin.
