Thread: [Crazy: Income-Generating NFTs | Virtual Casino Land](#)

MegaByter - April 22, 2021, 5:36 pm

You can purchase a piece of land inside the Decentraland metaverse, in the form of an NFT, and have the roulette / slot machines / black jack table that's on it make you 30% of the house winnings.

Pretty insane!

I tried going to a casino in Decentraland, nothing worked... but it could have been only that place if there is more than one.

Works fine for me, yeah there's a few casinos, you can play with "play money" if you don't want to use real \$\$\$.

Assuming that's what you attempted, perhaps you needed to top-off your play money balance and were trying to play with 0 balance?

It was a while ago but yes I did try to play with play money. Couldn't find where to get the play money though.
