Thread: [Apps for uploading snap stories](#)

lesoleebay - April 23, 2021, 11:06 am

Without making them look like they come from memories or whatever, I bought an app on here for 70\$ and it never worked, what are the current working apps/methods for this?

Mentalki123 - April 23, 2021, 11:14 am

you can try android/ios emulator

Meow - April 23, 2021, 3:05 pm

Spiral's app, SnapBytes, AstroSnap, etc

amp. - April 23, 2021, 4:47 pm

nobody will tell you that you dont need to pay for any app and you can do it without modded snap lmao

Meno - April 23, 2021, 8:48 pm

I would recommend SnapBytes. They have a great support team, a great app, and are regularly updating it. You can find their thread here.

<https://hackforums.net/showthread.php?tid=6141504&highlight=snapbytes>

If you let them know I sent you, they will take good care of you.

Justaboywithabag - April 24, 2021, 1:32 am

Prequel for ios, chickencam for android

I would reccomend snapbytes too the owner is childish and will beam you from the server if you have any issues or questions with the apk. now I reccomend not using chickencam cause its inconsistent. youll upload a picture then you check and it uploaded a black screen. use the memory method it works the best

Obviously if you're on IOS don't pay for his app and sort a modded client for free, it's not hard.

Edit

I guess if you're too stupid to know how to jailbreak, buy his app for IOS.

Mutiny - *April 25, 2021, 10:12 am*

Snapbreak is free if you're on IOS and jailbroken
