Thread: [Rat Client Not Showing/Connecting](#)

Eclipse - April 28, 2021, 9:17 am

Hi So i have nanocore Ports Open Not UPNP cus it closes my port no Nanocore Works Clients show/Connects

BUT other rats like dark comet async Dosent Show clients?? And Ports are open Why and How do i fix it

FIVE7 - April 28, 2021, 9:51 am

are you using same ports for the rats or different ports ?

secondly, do you have a problem using a better paid rats than this public old craps ?

DI?E - April 28, 2021, 11:11 am

Why is there a surge in people using these outdated rats? ?

No i use Async Its not outdated + Too poor to afford Paid Rats

And Give me Some UPdated Rats Free To Paid

And yes i use different ports BUT that is open

Well nanocore is good AND its they only rat that works for me. SOME HOW

Read the other reply for FIVE u may know the issue clearly

darkterror - April 28, 2021, 12:31 pm

are you sure you settings are correct? check listening port, try using localhost instead of IP and if you wanna check if port is really listening than check canyouseeme.org

hazbot77 - April 28, 2021, 3:27 pm

Nanocore is backdoored and a terrible rat now. Use something else.
