Thread: [\[Advice\] How to invest in these four coins?](#)

Beaks - May 2, 2021, 10:21 am

What is the easiest way for me to invest in these four coins and hold with the least amount of wallets? Putting \$5k in.

Giving a small tip to helpful answer!

XEQ
LML
DEC
ChainX (PCX)

Not sure if it's a smart idea to invest in crypto if you can't figure out how to buy them.

Any holy moly you chose the smallest of small caps, didn't you?

There are sites like coingecko and coinmarketcap where you can see where to buy coins.

\$5k into them is a ballsy move. High risk/high reward for sure.

Dec is an er20, I'm not sure about the rest.

I know where to buy them all looking for an exchange that has all of them.

Can afford to lose 100% of what I put in :)

XEQ, DEC and PCX you can buy on Hotbit. LML you can buy on either Uniswap (V2) or BitBay.

Source: Coinmarketcap

Hope this helped you.

CMC/Coingecko > Search Coin > Click "Markets" tab > Choose an exchange > Sign Up > Deposit > Market Buy
