I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Just so anyone thats curious, I think this is a scam. I bought their month plan to try it out. The proxies came using their DNS names not ipv4 addresses. Been waiting for support for half an hour so far and no one is talking despite it saying they're online.

Gonna post more info for review as the day goes on. Hopefully OP does his job?

Edit1: So I joined their discord and one of the owners got back to me so we have progress. Hoping these guys are legit since I like to support the smaller peeps

Edit2: An update. Proxy issue got resolved after about a day. So far has been pretty solid. They're good quality.

We're excited to update MazeProxy with the most requested feature from users everywhere — dark mode. You can enable it on top right of dashboard, near where it says your username!

We have deleted all non working IPs and refreshed the pool. You will have much better performance and speed now. 1.7M active and online IPs.

New IP Pools

If you have any package with us we just updated our proxy lists. Please update it to the newest one you see on the dashboard. This should boost your proxy performance by approximately 33%. Thank you so much for everything!
