Thread: [\\$BABY - NFT Mint Token](#)

skins2come - May 11, 2021, 7:21 pm

\$BABY is a Fair launched automated P2P farming coin based on the BSC chain.

Our plan is to make a NFT mint token where holders are able to collect randomized NFT Trading Cards and later on fight with them against other players where NFTs can be won from each other in a Trading Card Game.

For more information, visit [Dollarbaby.io](#)

Buy, hold, earn & compound fully automatically without any transactions. Watch your coins grow - 10% of every transaction will be sent to holders.

\$BABY allocation:

55% Burned
9% Team
1% Marketing
31% Pooled

LP locked until 31. Dec, 2023 ?

Most important thing: relax and be patient ?

We didn't yet started to make any big marketing move. We want to extend our website (dev tab) so people know who they are trusting.

Also we also added token information on BSCScan, aswell as Coinhunt and a few other sites to open our doors for big investors.

Until then we need to build up liquidation, we started with 10 BNB 3 days ago and are staying currently at 16 BNB already.

Patience is ?

LP is now locked until 31. Dec, 2023 ?

This looks quite bad tbh, owners run a ghost exchange and a coin faucet? faucets are commercial and greedy as f*ck.

Atleast some shitcoins try to hide their greedy side..

And I see fancy nicknames but no faces.

What is a „ghost exchange“? Can you elaborate?

If you mean the bitpr0.com dashboard, it's just a live coin price list, not a exchange.

We actually generate quite the amount of crypto traffic with our faucets, you'd be amazed how useful this can be to push new projects.

the website is crappy on desktop but is ok on a phone. how can we be sure you wont pull the rug?

Btw is the tron site for sale still?
