Install TamperMonkey from Google Extensions.

Go To Create A New Script.

Copy & Paste Script into TamperMonkey.

Click File Then Save.

Bot is working when you got to faucet pages.

Run Tabs for each faucet like i have running.

I suggest signing up to the faucets before you install bot.

Faucet links.

Edited it a little bit so it works with LTC, Doge and Chainlink again... But I think you have to open every Tab by yourself because it only opens ADA for me rn.
