Thread: [Tesla Sold their Bitcoin stake | Thoughts ?](#)

**Tomb Raider** - May 16, 2021, 12:05 pm

Did they already sell / plan on doing ?

How do you think the markets will react tonight

**Cap** - May 16, 2021, 12:07 pm

As the market is already starting a correction, I believe it's going to drop Bitcoin down along with the whole market.

That is not an admission of selling, lol. He literally replied with one word. How do you know he wasn't responding to the latter of that tweet, "I wouldn't blame him"?

Musk deliberately said Tesla did not sell any Bitcoin and wasn't planning to when he announced they wouldn't accept it for payments.

**Forensic** - May 16, 2021, 12:12 pm

Elon is taking the outright piss but yes I feel like this was inevitable after the last statement a few days ago. Musk should probably be investigated to be honest.

That's how I read his post as well. A know that the market is definitely dumping right now. He better start buying all of the Bitcoin that everyone else is selling or there are going to be some pretty angry people lol.

**Cap** - May 16, 2021, 12:20 pm

Just let Bitcoin keep dumping, that way we can stack up more :)

**Marvelous** - May 16, 2021, 12:23 pm

Honestly I wouldnt mind if Musk just sold all his BTC and never spoke about crypto again. This make has worse twitter fingers than Trump.

This. We briefly went below the support line and could see \$42k once Asia is online

May consider dropping some large around there

**Tommie R** - May 16, 2021, 12:32 pm

This non-sense dump that's without any solid reasons.. just based on FUD.. means that there's a big

buying opportunity. I better not see all the weak paper hands that are cashing out right now come back 1 year later 'I would've been rich if I held Bitcoin'.. that shit is annoying AF.

Building wealth is oftentimes DIFFICULT, it doesn't happen easily. Anyway, I believe the BTC utility will continue to grow. There's no way all the projects built around Bitcoin will stop just because the market prices dip. There are too many smart people behind Bitcoin. I'm betting on that.

Elon is saying the same things I have been saying (lmao just the mining part). Though I think he is trying to cause a market crash on purpose. Not sure whats with his obsession with Doge, it's a cool coin but is it this cool?

**BalleJatta** - May 16, 2021, 12:54 pm

Elon is a fiat whale, BTC whales decides the game in crypto. Wait and we will be back on track, glad he did this at least the moon boys will go away for a while

**Alex J** - May 16, 2021, 2:06 pm

Oh crap! he really did it !

this week gonna be one hell of a week. so much action

**Maskin** - May 16, 2021, 2:16 pm

Elon musk being involved in crypto is the biggest bubble crypto will ever have. Lol.

People must be willing to sell BTC at that price in the first place. Doubt people will.

True but as much as they say they would buy at \$100 if it was that price again they wouldn't
