Thread: [Ethereal ~ A 317 OSRS Experience. Quick bossing, Fast levels. NEW WEBSITE](#)

?ULL - May 16, 2021, 10:11 pm

EDIT Thanks for the WEBSITE UPGRADE @UnderBot!!!! The new website is awesome!

Looking for some help designing a new OSRS, Some details and media below.

UPDATES

Gonna throw these under spoilers:

5/16

Spoiler ([Click to View](#))

New boxes with chance of high tier loot dropped from rock crabs

Reworked woodcutting, etc.

Reworked Dungeoneering

Getting GE Up and going!!!

Added PET box with custom loot table.

Added AFK Tree- Drops cash and pet keys.

Much much more! Come join and help design the server around your wants!

6/22 - Ethereal 2.0!

Spoiler ([Click to View](#))

Update Notes: Ethereal 2.0

Player Suggestions:

Changed global messages from pink to white: Taz/Bear

Bug-Reports

Added error handler to ::whatdrops command - If you use it wrong it will now tell you how to use it.

Fixed overloads still giving Vials: Faisal

added error handler to ::maxhit command

Fixes:

Removed alot of unused imports in the source files

Kraken rework has been implimented; All done by Cyren!!!

Fixed regular alter at home, it now works.

Moved Fairy from oldhome to newhome

Moved Ghost town citizen from oldhome to new home

Removed objects in newhome general store to make room for NPCs

Moved shopkeepers at newhome behind counter, they no-longer walk.

Moved Theiving to home - Will add custom theiving area and redo theiving skill later.

Fixed an issue with Bloody Scimitar cuasing combat tab to show you were unarmed

Moved Town Crier message array to GameSettings, instead of TownCrier class.

Moved all SHOP NPC's to the newhome.

Nerfed the Ginrei for player use.

New Content:

Added Rise of the 6 (Barrows Minigame) to teleport Interface.

Added Bloody Scim as the default weapon for new players.
Implimented Ginrei Kojaku - Powerful bow with fast attacks.
Implimented TownCrier eventhandler, he now is coded to shake his bell and display messages above his head- like osrs.

NEW AREA - Creature Creation!

4 BOSSES!

This area will benefit both new players and old! With custom content only available in this area, prepare for some grinding! The bosses drop the new, most powerful bow in the game. The Ginrei Kojaku. With a super fast attack speed and power to match, this bow will shred NPC's! It has been blocked from PVP due to its RAW POWER.

Mapwork:

Deleted some items at home to make room for NPC's

Added some textures in certain areas to make things a little more flashy.

Deleted the shelving along the general store wall to make room for all of the NPC's.

What is Ethereal?

Ethereal is a 317 revision RuneScape private server loading 617 content and being developed solely by myself. I come prepared with an extensive background in server hosting for other games, as-well as have 17 years in the IT field under my sleeve. As of right now, Ethereal is a long-term project which I plan to devote a fairly large amount of my free time toward. Ethereal updates are based upon player input, as any game worth playing must value the direction in which the community wishes the game to go. We have only just released and I will be making handfults of edits/modifications over the course of the next few weeks before I tackle larger updates containing much desired content.

Thread looks great man! Only thing is HF doesn't allow the advertising of Discord Servers, so if I were you I'd remove that part from the OP.

Check my Convo message, I'll do you a favor and catch you up on HF. :P

Been playing on this server as an ironman and loving it, server is alot of fun! Keep it up with the content updates too, since I've been playing (started about a week ago) there has been 3-4 updates where content is added and bugs are fixed, also in the discord they are very open to suggestions and even implement them the same day if they like them enough.

Best of luck to you with your project. It's nice to see other private game-server owners here.

Thanks man! Hope you and your server are doing well!

I just updated the main thread with our most recent update. I will try to add all the micro updates too.
